

Daniel W Banazek

- Objective To obtain a position that allows me to contribute by using my experience supporting and developing software and data driven websites
- Technical Skills
- Developing and supporting software that interacts with the CM/ECF System for bankruptcy filings
 - Languages: Visual C#.Net, VisualBasic.Net, T-SQL, HTML, JavaScript, CSS, ColdFusion and XML
 - Software: Best Case Bankruptcy Software, MyECFMail, Visual Studios, SQL Server, IIS, RoboHelp, Microsoft Office (including Word, FrontPage, Access and Outlook), Dreamweaver, Flash, Photoshop and several screen-capture and non-linear video editing systems
 - Relational Database Systems: Microsoft SQL Server, Access and VistaDB
- Professional experience
- Best Case Solutions - Evanston, IL** January 2007 - Present
Programmer/ Developer
- Co-lead developer of MyECFMail, a Windows-based application for managing CM/ECF emails sent to bankruptcy attorneys (C#, VistaDB)
 - Primary duties: develop methods to download and parse emails; auto-download the free-look PDF files from the links in the emails; create a simple rules system to allow users to create calendar events based on docket text in messages; design and maintain a relational database stored on the end user's computer
 - Co-lead developer of MyCaseInfo.com, a web-based client questionnaire designed to be downloaded into Best Case Bankruptcy Software (VB.Net, SQL Server, IIS)
 - Primary duties: develop the administration site to manage attorney accounts and billing; create an automated database maintenance system; design a system for managing attorney invitations to prospective clients
 - Ongoing collaboration with the Technical Support, Sales and Marketing teams to plan the development cycle for Best Case Bankruptcy and related products
 - Offer responsive upper level help desk support for technical support staff and Best Case users
- Best Case Solutions - Evanston, IL** October 2003 - January 2007
Technical Writer
- Generate and edit help articles and other technical documentation for Best Case Bankruptcy and related products
 - Draft and implement documentation plans and timelines
 - Meticulously maintain consistent help standards for help documentation
 - Train and advise staff on creating help documentation
 - Monitor, update and maintain an internal technical support intranet
